

Where Space, Form, and Experience Take Shape

At the School of 3D Design, creativity is not just imagined. It is shaped, carved, assembled and transformed. Whether you are exploring the intimacy of handcrafted furniture, the immersive power of spatial design, or the ecological vision of landscape architecture, NAFA nurtures makers who design with purpose. Our programmes merge tradition with technology, heritage with innovation, and artistic sensitivity with real-world functionality.

Diploma in Design (Interior and Spatial)

This programme focuses on human-centred spatial design that responds to how people live, work and gather. Through studio experimentation and real-world projects, students learn to create immersive, inclusive and emotionally resonant environments while developing a critical understanding of how space influences behaviour, wellbeing and social responsibility in a changing design landscape.

Diploma in Design (Furniture and 3D Crafts)

This diploma develops designers through material-led practice, combining handcraft and digital fabrication to create jewellery, lifestyle objects and sculptural forms. Rooted in Southeast Asian heritage and contemporary culture, the programme equips students to design with purpose, market awareness and sustainability – preparing graduates to launch independent brands, contribute to the circular economy, or innovate within the craft and design industries.

Diploma in Design (Landscape and Architecture)

What does it mean to design with nature in mind? This programme develops designers who work with — not against — nature. You will learn to shape resilient green spaces that enhance urban life, from rooftop farms to neighbourhood parks, exploring the interconnections between people, place and ecology. With fieldwork, site analysis and industry collaboration, you'll build a strong landscape vocabulary while tackling pressing challenges like climate change and biodiversity loss, empowering you to design inclusive outdoor environments that connect communities and honour the natural world.

Bachelor of Arts (Honours) Design Practice

The BA (Hons) Design Practice is an honours degree designed for bold thinkers who are ready to deepen their craft and expand their influence. You'll join a rigorous three-year programme (with direct entry into Year 2 for NAFA Diploma graduates) focused on innovation, purpose-driven design and industry relevance.

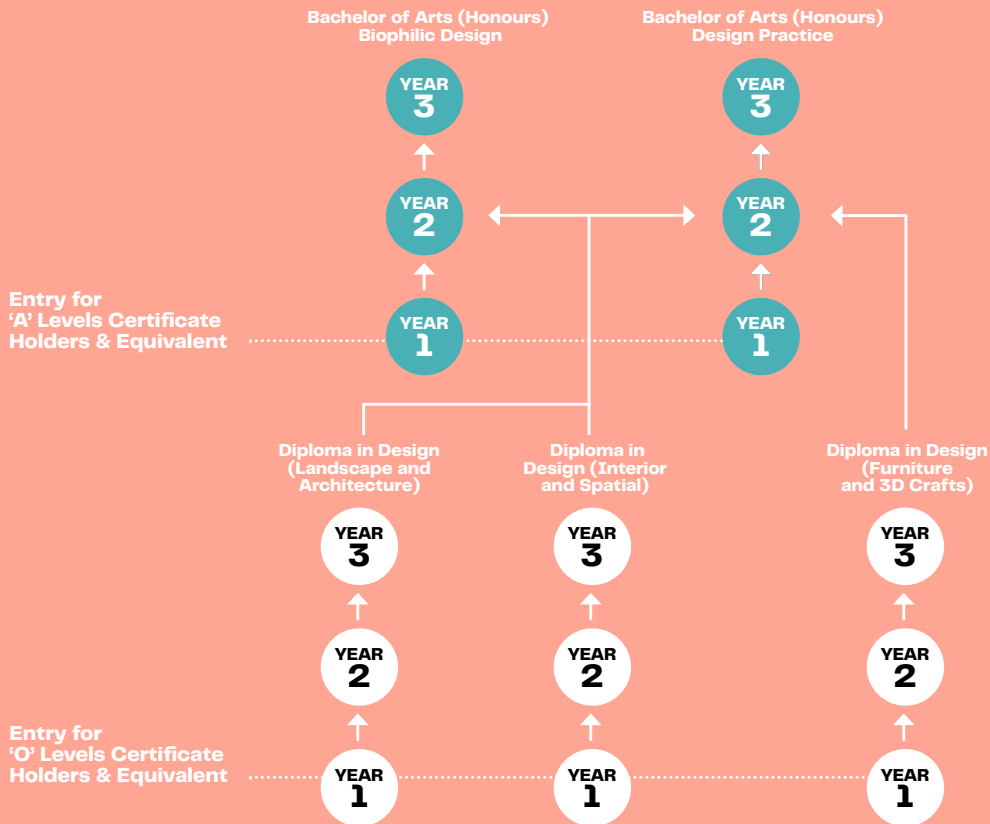

Bachelor of Arts (Honours) Biophilic Design

The first in Asia, this degree bridges the worlds of spatial design and sustainable living. Biophilic Design seeks to harmonise human experience with nature, integrating natural systems, materials and philosophies into built environments that heal, inspire and uplift.

Where Can We Take You?

Each 3D Design diploma opens a direct pathway to degree studies, advancing you into BA (Honours) Design Practice or BA (Honours) Biophilic Design. It's your next step toward sharpening your creative voice, expanding your perspective, and shaping a future in design with clarity, purpose, and ambition.

A Space Imagined Through Your Vision

Why Choose NAFA | School of 3D Design

FIND OUT MORE

Design with Depth and Technical Rigor

Master core competencies in spatial thinking, prototyping, digital modelling, materials, and fabrication – supported by hands-on studio practice and real-world project briefs.

A Community that Builds and Innovates Together

Collaborate within a vibrant ecosystem of designers, architects, makers, and educators. Critique, experimentation, and multidisciplinary teamwork shape your identity as a thoughtful and confident designer.

Rooted in Southeast Asia, Connected to the World

Explore regional environments, cultural narratives, and climate-responsive design while engaging with global approaches, sustainability frameworks, and international collaborations.

Pathways from Foundation to Professional Practice

Progress seamlessly from diploma to degree, with opportunities to specialise in Biophilic Design or evolve your creative approach through BA Design Practice – preparing you for dynamic roles in architecture, spatial planning, furniture, product design, and creative industries.

Diploma in Design (Furniture and 3D Crafts)

Craft, Materiality, and Form

This diploma shapes designers who think through materials and express ideas through crafted objects. You will develop a strong understanding of form, craftsmanship, ergonomics, and contemporary making.

The Programme Offers:

- Exploration of furniture design, object-making, and artisanal practices
- Training across wood, metal, digital fabrication, and mixed materials
- Collaboration with industry and cross-disciplinary design teams

Diploma in Design (Interior and Spatial)

Where People and Places Meet

This diploma nurtures designers who shape spaces with intention and insight. You will learn how interiors influence behaviour, culture, and comfort – and how spatial design can enhance everyday living.

The Programme Offers:

- Core training in interior planning, spatial design, lighting, materials, and human experience
- Hands-on fabrication, digital modelling, and concept development
- Industry projects align with industry design practice

Diploma in Design (Landscape and Architecture)

Design Environments that Shape How We Live

This diploma builds strong foundations in landscape, urban, and architectural thinking. You will learn to create meaningful outdoor and built environments through ecological awareness, spatial planning, and material exploration.

The Programme Offers:

- Training in landscape design, architectural concepts, spatial analysis, and site planning
- Exploration of sustainability, climate-responsive design, and Southeast Asian environmental contexts
- Studio-based learning with model-making, prototyping, and digital visualisation

Bachelor of Arts (Honours) Biophilic Design

Design for Human Well-Being and the Living World

This degree develops designers who integrate nature, sustainability, and human experience into spatial and environment design. You will explore regenerative futures, ecological thinking, and Southeast Asian environmental contexts.

The Programme Offers:

- Advanced concepts in biophilia, sustainability, ecological systems, and living design
- Research-informed design practice with strong regional grounding
- Cross-disciplinary collaborations with architecture, landscape, and environmental experts
- A launchpad into roles in spatial design, regenerative design, environmental design, and consultancy

Bachelor of Arts (Honours) Design Practice

**Expand Your Creative Identity.
Redefine Tomorrow's Design Landscape.**

This three-year honours degree empowers you to shape design as a purpose-driven practice. Deepen your craft in one of four design domains of 3D, Communication, Spatial or Fashion and challenge assumptions and learn in a collaborative environment with an interdisciplinary faculty.

The Programme Offers:

- Research-led design approaches that push the boundaries of conventional practice
- Interdisciplinary collaboration across University of the Arts London (UAL), including theatre, dance, fashion and media
- International exposure through study trips, placements and collaborative labs
- A launchpad into roles across and beyond the creative industries, supporting pathways into social innovation, community-led initiatives, cultural sectors, and public service creative leadership, and entrepreneurship
