

## **CREATING AUDIO PODCAST FOR DIGITAL MEDIA PLATFORM (6 SESSIONS X 3 HOURS)**

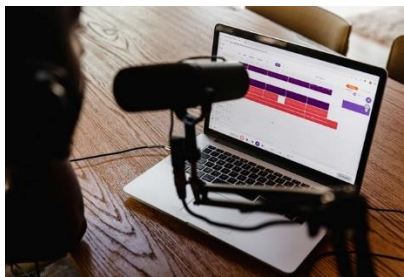

This course aims to equip learners with audio creation skills to produce a podcast. Learners will be using the Adobe Audition software to learn about sound design components. In addition, they will be introduced to audio recording practices and mixing techniques integration to create an audio podcast for the digital media platform

### **Course Content**

- Introduction to audio technology and sound production in digital media.
- Introduction to Adobe Audition software application.
- Understand audio terminologies and equipment used for a podcast production workflow.
- Learn the best practices for audio podcast formats, digital file types and files sharing.
- Apply audio elements and parameters using Adobe Audition to create sound design for podcast production.
- Develop and create engaging audio content for the digital media platform.

### **Learning Outcomes**

- 1) Demonstrate an understanding of audio technology and the workflow of sound production in digital media.
- 2) Apply Adobe Audition software with practical techniques and audio parameters to create an audio podcast.
- 3) Plan and design engaging audio content format to enhance the user listening experience.

### **Certification:**

Learners will be presented with a digital Certificate of Participation upon attaining a minimal 75% attendance rate.
