

## **METaverse: INTRODUCTION TO AUGMENTED REALITY DESIGN (6 SESSIONS X 3 HOURS)**

This course introduces learners to Augmented Reality in a Metaverse setting. Learners will understand the fundamentals and practices of AR design using Adobe Aero. In addition, the learners will learn how to apply and integrate components such as visual and audio functions to create interactive AR content for an engaging user experience.

### **Course Content**

- Introduction to Augmented Reality (AR).
- Augmented Reality (AR) technology as an interactive media in a metaverse setting.
- Introduction to Adobe Aero software for Augmented Reality (AR) design experience.
- Understand using the Adobe Aero interactive tools with audio and visual components.
- Create and develop interactive content into Augmented Reality (AR) application for user experience.
- Apply Augmented Reality (AR) content for online media engagement.

### **Learning Outcomes**

- 1) Demonstrate an understanding of the basic concepts of Augmented Reality workflow in a Metaverse setting.
- 2) Apply essential skills in Adobe Aero Augmented Reality software to create Augmented Reality content.
- 3) Create, apply and develop Augmented Reality content to enhance user experience.

### **Certification:**

Learners will be presented with a digital Certificate of Participation upon attaining a minimal 75% attendance rate.

**Enquiries:**

**1) Application**

Apply online during application period.
