

MOBILE PHOTOGRAPHY (8 SESSIONS X 3 HOURS)

Mobile photography is essential for everyday use, from personal to professional in our digital age. In this course, learners will be introduced to the functions and features of the smartphone camera and apply simple design principles for good compositions that set an average photo to an amazing one. Other topics include equipment and accessories and editing techniques for mobile photography. The course will be conducted both indoors and outdoors, and learners will be required to bring their mobile device, such as a phone or tablet (iOS or Android). This course is ideal for learners with little or no experience in mobile photography.

Learning Outcomes:

At the end of this workshop, learners will be able to:

- 1) Understand the smartphone camera techniques and practices
- 2) Create a personal style of photography through the function and features of a smartphone camera
- 3) Apply skills and techniques for unique content

Certification:

Learners will be presented with a digital Certificate of Participation upon attaining a minimal 75% attendance rate.
